

Bay

meeting space

Let's have a meeting in the Bay...

The perfect place for private telephone calls, with outstanding soundproofing & echo-free acoustics, have conversations that remain confidential and free from outside distractions as well as in privacy without disturbing neighbouring colleagues.

Who we are

Panel UK is a proud British manufacturer in the North of England. Established in 1999, we have unrivalled experience within the global office furniture industry exporting to many countries. Where other companies import product we design, fabricate & assemble, by hand, each & every product to the highest of quality standards. Our in-house skills allow us the flexibility to offer a truly unique service, including bespoke products if needs be, suited to your project's precise needs.

What we do

Our guiding principles are to use recycled raw material, the least components & have a highly skilled workforce to create reusable & reconfigurable products of the highest quality, least impactful on the environment at an affordable cost. Our products are insightfully designed, & responsibly manufactured using lean methodologies to reduce waste. We are innovative where possible, with a specific emphasis on recycled content as well as the processes we operate, we are fully committed to a low carbon society.

Sustainability

The focus & drive of everything we do is to protect the environment through sustainable design & manufacturing, to create a better & more prosperous world to live in. We do this by designing products that last, using recyclable materials, with a local UK labour force. Our carbon footprint is small, we source components locally, where possible, & endeavour to minimise our impact on the environment.

PANEL

Established in 1999.

Features and Functions

Bay can be supplied with a padded rear panel (CLOSED) or OPEN as in the image above. When specified as OPEN the units can be positioned together to form a larger meeting space.

The mobile version of Bay comes with rotating, lockable castors making it easy to move into the location you need it. The castors are locking too so once it's in position it will not move whilst using it.

The upholstered seat & back rest on Bay have been ergonomically designed to enhance comfort and make sitting for prolonged periods relaxing & refreshing.

The Bay unit comes with PIR controlled LED lighting flush mounted into the upholstered ceiling so, when not in use, the lights are not wasting energy.

The Bay units offer superb acoustic performance, even in a busy office, once you step inside, the chatter just disappears and you can meet in peace & quiet.

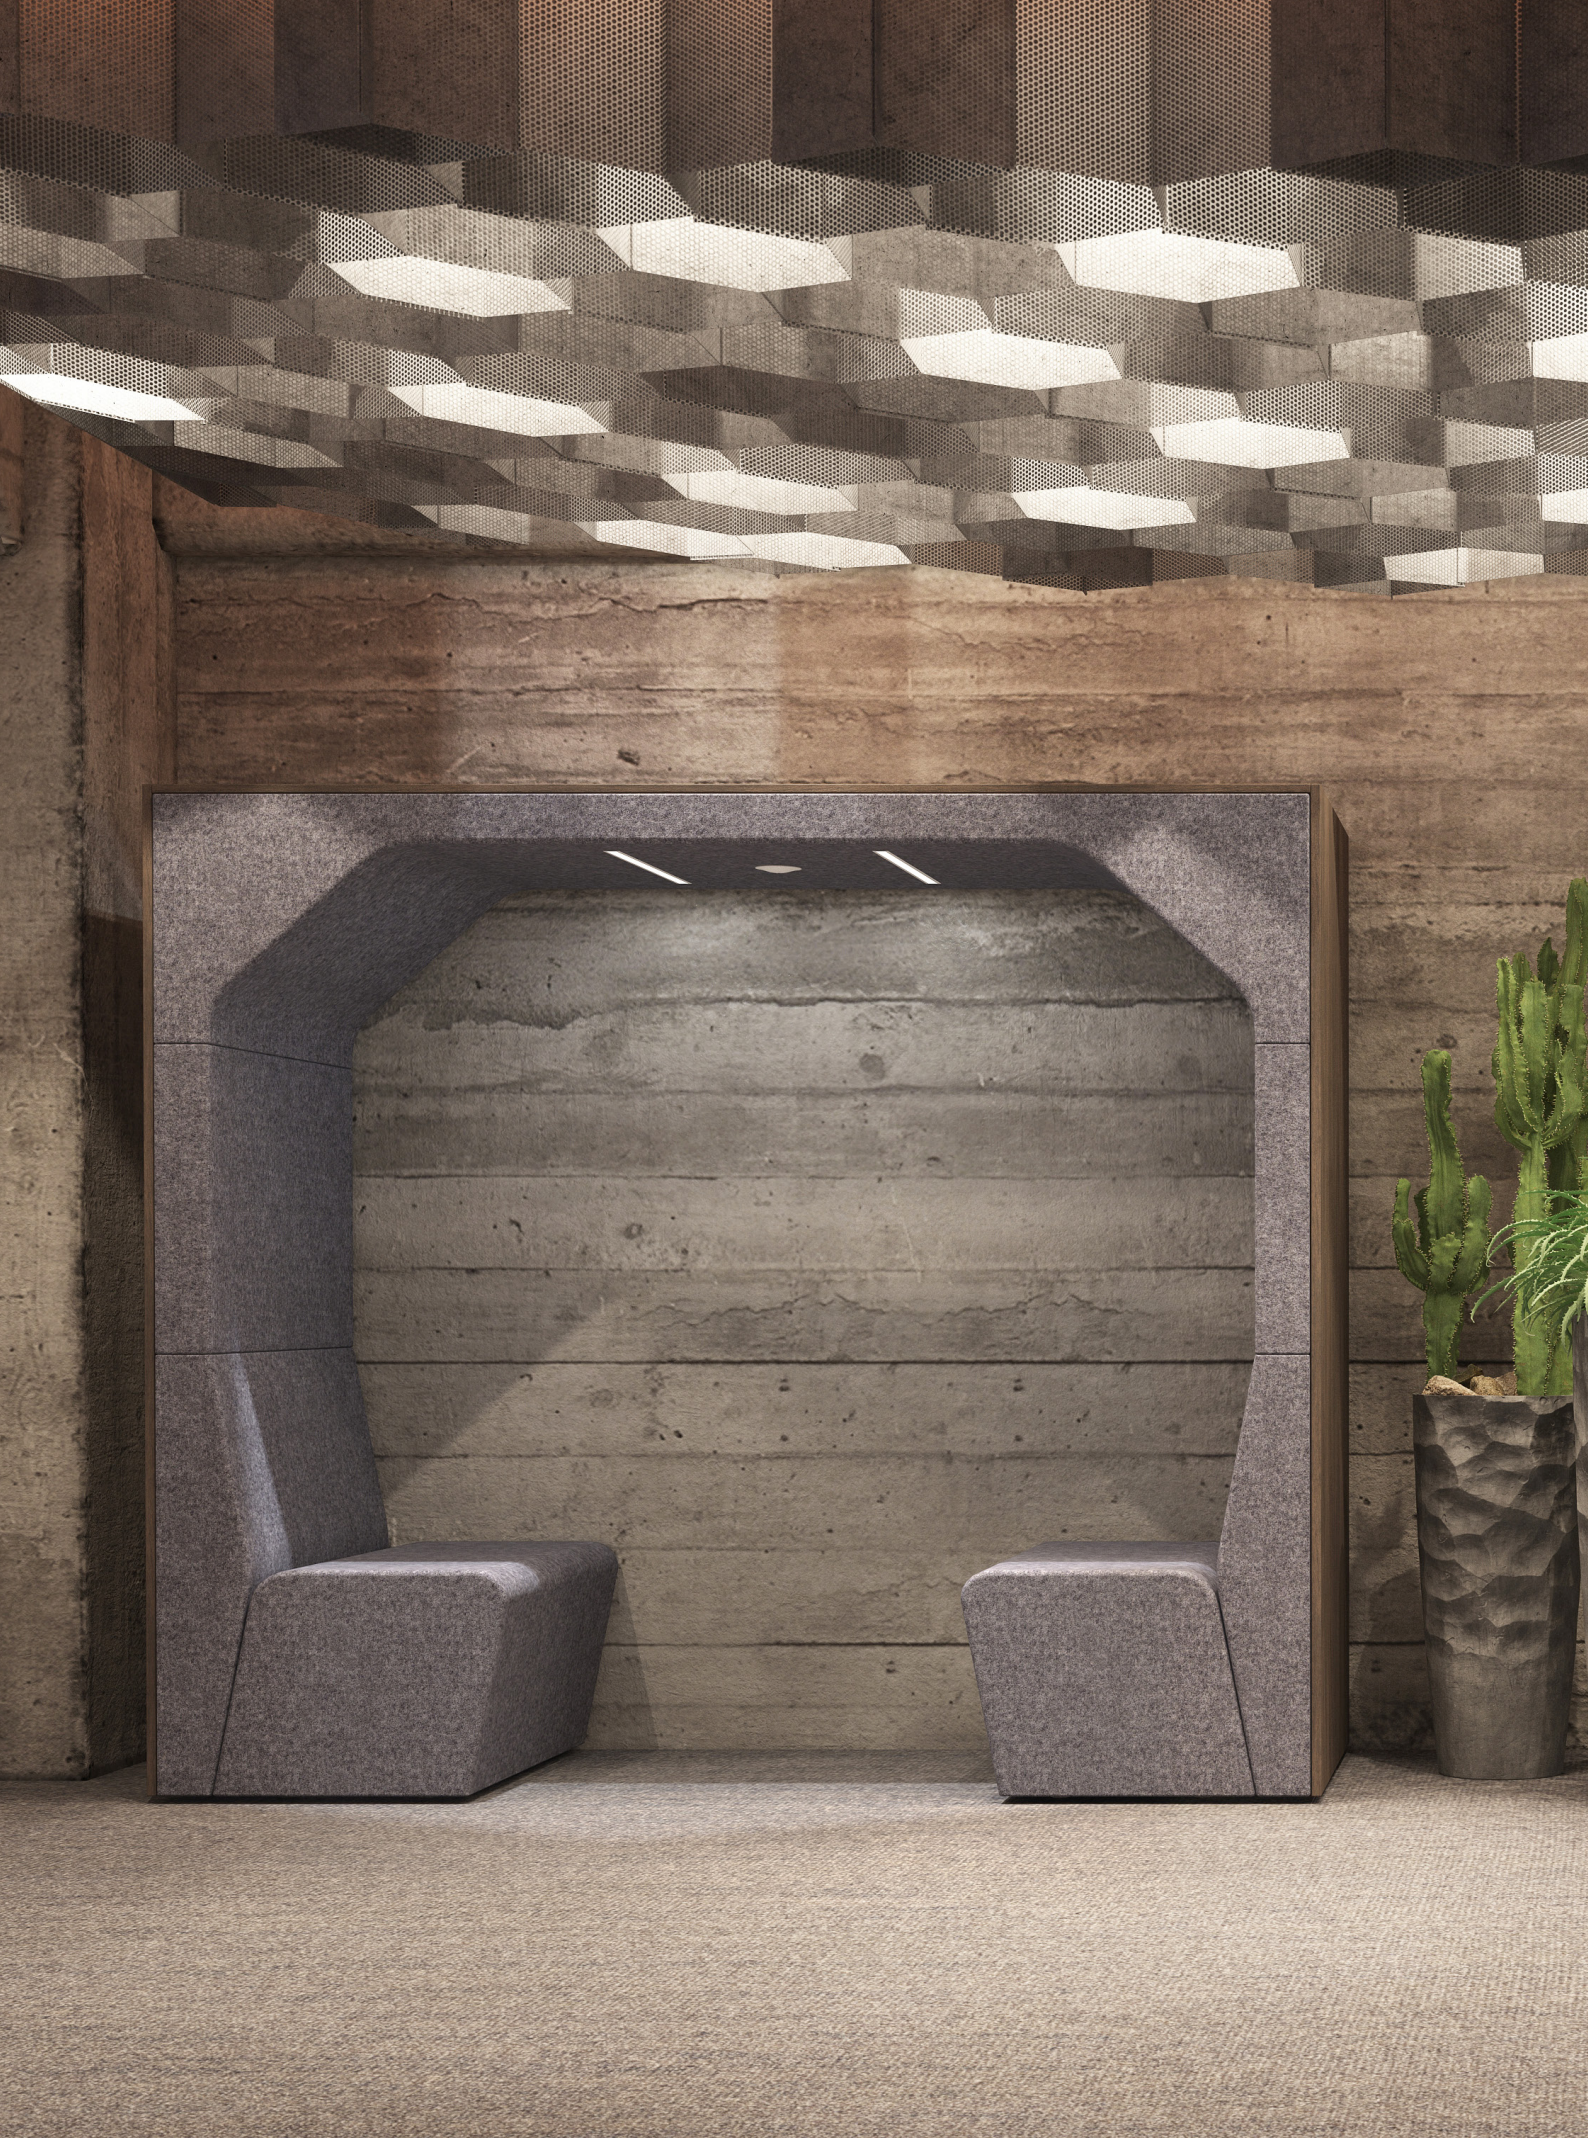

You can specify Bay with or without a table. The CLOSED version has a fixed table and the OPEN version has a freestanding table.

Bay can be upholstered in a number of fabrics, we recommend Re-spun by Inloom. You can get creative by mixing colours on different sections of upholstery & we can even supply with dry wipe boards.

Desk mounted power module installed to the fixed worksurface. Specified in Black or White. Dual or Triple configurations including USB A+C, Power, Data.

FABRIC

RE-SPUN by Inloom is created by recycling old garments which are collected from recycling bins and taken to the factories to be sorted into clothes which can be resold as pre-loved or cut into rags to start the production of creating recycled wool. The sustainability of the process is added to by the almost complete elimination of dyes because of the way the wool is recycled, helping to safeguard the planets natural resources.
