

Chatterbox

conversation space

Call me in the Chatterbox...

The perfect place for private telephone calls, with outstanding soundproofing & echo-free acoustics, have conversations that remain confidential and free from outside distractions as well

Who we are

Panel UK is a proud British manufacturer in the North of England. Established in 1999, we have unrivalled experience within the global office furniture industry exporting to many countries. Where other companies import product we design, fabricate & assemble, by hand, each & every product to the highest of quality standards. Our in-house skills allow us the flexibility to offer a truly unique service, including bespoke products if needs be, suited to your project's precise needs.

What we do

Our guiding principles are to use recycled raw material, the least components & have a highly skilled workforce to create reusable & reconfigurable products of the highest quality, least impactful on the environment at an affordable cost. Our products are insightfully designed, & responsibly manufactured using lean methodologies to reduce waste. We are innovative where possible, with a specific emphasis on recycled content as well as the processes we operate, we are fully committed to a low carbon society.

Sustainability

The focus & drive of everything we do is to protect the environment through sustainable design & manufacturing, to create a better & more prosperous world to live in. We do this by designing products that last, using recyclable materials, with a local UK labour force. Our carbon footprint is small, we source components locally, where possible, & endeavour to minimise our impact on the environment.

PANEL

Established in 1999.

Features and Functions

Chatterbox is constructed with durable high-grade aluminium, it ensures both structural stability and a sleek, modern robust appearance.

Chatterbox can have the fully acoustic door hung to the left or to the right, depending upon the layout of your scheme.

We can supply Chatterbox with decorative panels that can be either upholstered, laminated (solid colour or wood effect) or in a fully glazed configuration.

Using a two-pass powder coat paint process our best-in-class finish provides a quality, lasting finish to all exposed metalwork. We can even supply the aluminium in a wood effect to soften the aesthetic.

Each Chatterbox comes with a centrally located LED light and power with TWIN USB fast chargers.

We can provide the glazed partition walls and the acoustic door with manifestations to offer a little more privacy where needed.

As mentioned, the outer walls of the Chatterbox can have decorative panels, you can also design your own laminate and create a unique style.

We can also supply the Chatterbox with a full biophilia living wall to introduce foliage to truly enhance your working environment.

FABRIC

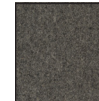

RE-SPUN by Inloom is created by recycling old garments which are collected from recycling bins and taken to the factories to be sorted into clothes which can be resold as pre-loved or cut into rags to start the production of creating recycled wool. The sustainability of the process is added to by the almost complete elimination of dyes because of the way the wool is recycled, helping to safeguard the planets natural resources.
